MEMORANDUM

SUBJECT: ARCS Tasked Site Inspection
Union Pacific Rail Yard (OKD987082930)

FROM: Kim T. Hill (6H-MA)
Site Assessment Manager
New Mexico, Oklahoma and Indian Nations
Superfund Site Assessment Section

TO: Stacey Bennett
ARCS Work Assignment Manager
Superfund Hazardous Waste Section (6E-SH)

According to the November 23, 1992 printout of your Work Assignment database, a Site Inspection (SI) for the above-referenced site was tasked to the ARCS (Work Assignment dated September 17, 1992). However, Superfund file material indicates that a SI was conducted on this site in conjunction with the El Reno Roundhouse Area (OKD987073475) site on September 17, 1991.

A review of the SI led to the further decision (Superfund Site Strategy Recommendation for the El Reno Roundhouse Area dated September 26, 1991) that an Expanded Site Inspection was warranted for the combined sites.

It is further recommended that the current task, the Union Pacific Rail Yard SI, be substituted with an ESI for the combined sites under the name of the El Reno Roundhouse Area.

If you are in need of additional information, please contact me at x6672.
